K.HARTWALL Logistics Efficiency through Innovation

> earbox sembly

> > DA.

Our LiftLiner[®] product family is a compact tugger train solution for internal logistics and an excellent choice for forklift free environments. Avoid the complexities of sequenced deliveries to maximise production flexibility.

WELCOME TO THE FAMILY

Increase efficiency, Health & Safety and ergonomics through

- Compact train length
- Fully electric lifting and tilting technology
- Ergonomic loading and unloading from either side
- Tight steering angles
- Excellent tracking

LOOK AT WHAT YOU CAN ACHIEVE WITH LIFTLINER®

Implement forklift-free operations

Improve the efficiency of an existing tugger train system

Improve ergonomics and Health & Safety

Find a solution to support a new production layout

Move to partial or fully automated operations

Reduce Total Cost of Ownership

EFFICIENT MILKRUN OPERATION

Create a forklift-free environment

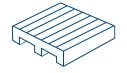

LIFTLINER® TUGGER TRAINS

Flexible units for different loads and processes

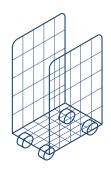

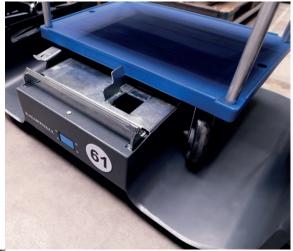

- Transports multiple load carriers in various sizes on a single LiftLiner®
- Shortest tugger train on the market
- Most efficient deliveries to production lines

- First tugger train to transport a wide range of roll cages and dollies
- Extremely compact design
- Easy and streamlined fleet handling

(Un-)loading from either side – no need for sequencing

INCREASE EFFICIENCY

BUNDLE INDIVIDUAL

Transports various load carriers in multiple sizes

Extremely compact design tailored to the load dimensions

▲ SAVE TIME

Fast and fully electric lifting increases agility

INCREASE HEALTH & SAFETY

ENSURE SAFETY >

Train only moves when the carts are locked

♦ PREVENT BUCKING

Safe transport through an excellent tracking accuracy

MINIMISE HAZARDS **^**

Walk-through between carts is prevented by the crossbar coupling

♦ PREVENT INJURIES

Smooth rounded edges of the carts create a safe work environment

INCREASE ERGONOMICS

HANDLE LOADS SAFELY **^**

Combination of innovative design and tilting technology

MAKE UNLOADING EASY >

Tilting technology eases load carrier handling

SUPPORT THE OPERATOR -

Load carrier wheels turn automatically when tilting helping the operator unload

ENSURE EFFORTLESS LOADING >

Rooftop shape of the carts balances forces to ease the (un-)loading

SUCCESSFUL CUSTOMER PROJECTS

Transport of large non sortable parcels over long distances with LiftLiner[®] combined with K.Hartwall SmartCube[®] foldable cages that are placed on Daughter Carts.

When planning the new plant for the production of electric motors, Parvalux decided to use both the LiftLiner[®] and load carriers from K.Hartwall for internal material transport.

"With the LiftLiner[®], we were able to improve our general safety by reducing unnecessary forklift traffic in our terminal, and at the same time, improve the efficiency of moving parcels internally. This is especially critical in our operations during peak hours and high seasons", says Janne Mattila, Head of Sorting at Posti. "By implementing a milk run with the LiftLiner® tugger train we were able to increase the efficiency of the picking process as well as the efficiency and reliability of our internal material transport" comments Paul Gilbert, Logistics Manager at Parvalux.

WE ARE ALSO USING **THE LIFTLINER® TUGGER TRAINS**

K.Hartwall strives to create future fit logistics solutions that answer the needs of our customers and bolsters their industry development. Over the years, we have become specialized in smart logistics solutions for the Retail, Post & Parcel, Automotive and Industrial Manufacturing industries.
